---

## Professional Summary

Business systems and cloud collaboration specialist with 15+ years of experience designing, migrating, securing, and optimizing enterprise collaboration platforms. Known for bridging technical architecture with operational business outcomes, building automation frameworks, and improving SaaS governance in fast-growth and compliance-driven environments.

## Core Strengths

- Google Workspace & Microsoft 365 Administration
- SaaS Governance & Identity Access Management (IAM)
- Cloud Platform Migrations & Tenant Architecture
- Automation & Scripting (Apps Script, PowerShell, GAM, APIs)
- Security & Compliance (FedRAMP Awareness, Governance Controls)
- Stakeholder Communication & Solution Design

## Professional Experience

### Brio Technologies — Google Workspace Solutions Engineer

Serve as trusted technical advisor translating business requirements into secure, scalable SaaS solutions. Lead discovery sessions, design governance models, and support executive-level solution strategy.

### 66degrees — Google Workspace Deployment Lead

Led complex cross-platform migrations and enterprise Workspace deployments. Implemented automation frameworks and governance best practices using Advanced GAM and scripting workflows.

### Salesforce — Collaboration Systems Engineer

Supported FedRAMP-aligned collaboration environments. Built automation frameworks and strengthened compliance controls.

### Meta (Facebook) — Senior Google Workspace Engineer

Led governance restructuring and policy design initiatives improving operational clarity and access control.

### SADA — Google Cloud Consultant II

Delivered Workspace consulting, automation workflows, and executive collaboration support.

## Education

Associate Degree — Network & Systems Administration

## Certifications

- Google Cloud Professional Administrator
- CloudM Migrate Certified
- Google Workspace Deployment & Services Certifications
